TOXICOLOGY

SUBJECT INDEX

Volume 81 (1993)

adrenal, polyhalogenated aromatic hydrocarbons, aroclor 1254, corticosterone, stress, rat, Fishcer 344, 217
Ah receptor, chrysene, benzochrysene, methylchrysene, cytochrome P-450, enzyme induction, mutagenicity, ames test, 69
aluminum, manganese, mice, diet, development, brain, 33
ameloblasts, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, incisor tooth development, odontoblasts, 1
ames test, chrysene, benzochrysene, methylchrysene, cytochrome P-450, enzyme induction, mutagenicity, Ah receptor, 69
antioxidant enzymes, glutathione peroxidase, peroxidative stress, *tert*-butylhydroperoxide, critical level, 89
arachidonic acid, fatty acid anilides, prostacyclin, fibrinolysis, endothelial cells, toxic oil syndrome, phospholipases, 181
aroclor 1254, polyhalogenated aromatic hydrocarbons, corticosterone, stress, adrenal, rat, Fishcer 344, 217
azinphos-methyl, paraoxon, skin, malathion, gloves, knit, 195

benzochrysene, chrysene, methylchrysene, cytochrome P-450, enzyme induction, mutagenicity, ames test, Ah receptor, 69
Bowman's glands, dichlobenil, metyrapone, sustentacular cells, olfactory mucosa, cytochrome P-450, 113
brain, aluminum, manganese, mice, diet, development, 33

cadmium, calcium, nickel, vascular smooth muscle, detergent-permeabilized, 223
cadmium, transforming growth factor, *myc*, *fos*, *jun*, mRNA accumulation, thapsigargin, protein kinase C, protein kinase inhibitor, 155
calcium, cadmium, nickel, vascular smooth muscle, detergent-permeabilized, 223
cellular integrity, metabisulphite, kidney, 'marker' enzymes, urine, 173
chronic irritation, skin cancer, middle distillates, 103
chrysene, benzochrysene, methylchrysene, cytochrome P-450, enzyme induction, mutagenicity, ames test, Ah receptor, 69
concentration addition, osteolathyrism, malformation, mixtures, 123
corticosterone, polyhalogenated aromatic hydrocarbons, aroclor 1254, stress, adrenal, rat, Fishcer 344, 217
critical level, glutathione peroxidase, peroxidative stress, *tert*-butylhydroperoxide, antioxidant enzymes, 89
cytochrome P-450, dichlobenil, metyrapone, Bowman's glands, sustentacular cells, olfactory mucosa, 113
cytochrome P-450, ethanol, monooxygenase, induction, inhibition, hamster, 145
cytochrome P-450, chrysene, benzochrysene, methylchrysene, enzyme induction, mutagenicity, ames test, Ah receptor, 69

detergent-permeabilized, calcium, cadmium, nickel, vascular smooth muscle, 223
development, aluminum, manganese, mice, diet, brain, 33
developmental toxicity, methanol, rat embryo culture, mouse embryo culture, in vitro, 205
dichlobenil, metyrapone, Bowman's glands, sustentacular cells, olfactory mucosa, cytochrome P-450, 113
dieldrin, feed, gilts, progesterone, reproduction, 165
diet, aluminum, manganese, mice, development, brain, 33
2,3-Dimercaptopropane-1-sulfonate (DMPS), mercury, meso-2,3-dimercaptosuccinc acid (DMSA), DMSA monoesters, mice, kidney, 49
DMSA monoesters, mercury, meso-2,3-Dimercaptosuccinc acid (DMSA), 2,3-dimercaptopropane-1-sulfonate (DMPS), mice, kidney, 49

endothelial cells, fatty acid anilides, prostacyclin, fibrinolysis, toxic oil syndrome, arachidonic acid, phospholipases, 181

enzyme induction, chrysene, benzochrysene, methylchrysene, cytochrome P-450, mutagenicity, ames test, Ah receptor, 69
ethanol, cytochrome P-450, monooxygenase, induction, inhibition, hamster, 145

fatty acid anilides, prostacyclin, fibrinolysis, endothelial cells, toxic oil syndrome, arachidonic acid, phospholipases, 181
feed, dieldrin, gilts, progesterone, reproduction, 165
fibrinolysis, fatty acid anilides, prostacyclin, endothelial cells, toxic oil syndrome, arachidonic acid, phospholipases, 181
Fishcer 344, polyhalogenated aromatic hydrocarbons, aroclor 1254, corticosterone, stress, adrenal, rat, 217
fos, cadmium, transforming growth factor, *myc*, *jun*, mRNA accumulation, thapsigargin, protein kinase C, protein kinase inhibitor, 155

gilts, dieldrin, feed, progesterone, reproduction, 165
gloves, azinphos-methyl, paraoxon, skin, malathion, knit, 195
glutathione peroxidase, peroxidative stress, *tert*-butylhydroperoxide, antioxidant enzymes, critical level, 89

hamster, ethanol, cytochrome P-450, monooxygenase, induction, inhibition, 145
heart rate, rat, toxicology, temperature, thermoregulation, hypothermia, 15
human B-cells, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, immunocompetence, 131
hypothermia, rat, toxicology, temperature, heart rate, thermoregulation, 15

immunocompetence, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, human B-cells, 131
in vitro, methanol, developmental toxicity, rat embryo culture, mouse embryo culture, 205
incisor tooth development, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, odontoblasts, ameloblasts, 1
induction, ethanol, cytochrome P-450, monooxygenase, inhibition, hamster, 145
inhibition, ethanol, cytochrome P-450, monooxygenase, induction, hamster, 145

jun, cadmium, transforming growth factor, *myc*, *fos*, mRNA accumulation, thapsigargin, protein kinase C, protein kinase inhibitor, 155

kidney, mercury, meso-2,3-dimercaptosuccinc acid (DMSA), DMSA monoesters, 2,3-dimercaptopropane-1-sulfonate (DMPS), mice, 49
kidney, metabisulphite, 'marker' enzymes, cellular integrity, urine, 173
knit, azinphos-methyl, paraoxon, skin, malathion, gloves, 195

malathion, azinphos-methyl, paraoxon, skin, gloves, knit, 195
malformation, osteolathyrism, concentration addition, mixtures, 123
manganese, aluminum, mice, diet, development, brain, 33
'marker' enzymes, metabisulphite, kidney, cellular integrity, urine, 173
mercury, meso-2,3-dimercaptosuccinc acid (DMSA), DMSA monoesters, 2,3-dimercaptopropane-1-sulfonate (DMPS), mice, kidney, 49
mercury nephrotoxicity, non-protein sulfhydryls, renal mercury disposition, renal mercury excretion, 57
meso-2,3-dimercaptosuccinc acid (DMSA), mercury, DMSA monoesters, 2,3-dimercaptopropane-1-sulfonate (DMPS), mice, kidney, 49
metabisulphite, kidney, 'marker' enzymes, cellular integrity, urine, 173
methanol, developmental toxicity, rat embryo culture, mouse embryo culture, in vitro, 205
methylchrysene, chrysene, benzochrysene, cytochrome P-450, enzyme induction, mutagenicity, ames test, Ah receptor, 69
metyrapone, dichlobenil, Bowman's glands, sustentacular cells, olfactory mucosa, cytochrome P-450, 113
mice, aluminum, manganese, diet, development, brain, 33
mice, mercury, meso-2,3-dimercaptosuccinc acid (DMSA), DMSA monoesters, 2,3-dimercaptopropane-1-sulfonate (DMPS), kidney, 49
middle distillates, skin cancer, chronic irritation, 103
mixtures, osteolathyrism, malformation, concentration addition, 123
monooxygenase, ethanol, cytochrome P-450, induction, inhibition, hamster, 145
mouse embryo culture, methanol, developmental toxicity, rat embryo culture, in vitro, 205
mRNA accumulation, cadmium, transforming growth factor, *myc*, *fos*, *jun*, thapsigargin, protein kinase C, protein kinase inhibitor, 155
mutagenicity, chrysene, benzochrysene, methylchrysene, cytochrome P-450, enzyme induction, ames test, Ah receptor, 69

myc, cadmium, transforming growth factor, *fos*, *jun*, mRNA accumulation, thapsigargin, protein kinase C, protein kinase inhibitor, 155

nickel, calcium, cadmium, vascular smooth muscle, detergent-permeabilized, 223
non-protein sulfhydryls, mercury nephrotoxicity, renal mercury disposition, renal mercury excretion, 57

odontoblasts, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, incisor tooth development, ameloblasts, 1
olfactory mucosa, dichlobenil, metyrapone, Bowman's glands, sustentacular cells, cytochrome P-450, 113
osteolathyrism, malformation, concentration addition, mixtures, 123

paraoxon, azinphos-methyl, skin, malathion, gloves, knit, 195
peroxidative stress, glutathione peroxidase, *tert*-butylhydroperoxide, antioxidant enzymes, critical level, 89
phospholipases, fatty acid anilides, prostacyclin, fibrinolysis, endothelial cells, toxic oil syndrome, arachidonic acid, 181
polyhalogenated aromatic hydrocarbons, aroclor 1254, corticosterone, stress, adrenal, rat, Fishcer 344, 217
progesterone, dieldrin, feed, gilts, reproduction, 165
prostacyclin, fatty acid anilides, fibrinolysis, endothelial cells, toxic oil syndrome, arachidonic acid, phospholipases, 181
protein kinase C, cadmium, transforming growth factor, *myc*, *fos*, *jun*, mRNA accumulation, thapsigargin, protein kinase inhibitor, 155
protein kinase inhibitor, cadmium, transforming growth factor, *myc*, *fos*, *jun*, mRNA accumulation, thapsigargin, protein kinase C, 155

rat, polyhalogenated aromatic hydrocarbons, aroclor 1254, corticosterone, stress, adrenal, Fishcer 344, 217
rat, toxicology, temperature, heart rate, thermoregulation, hypothermia, 15
rat embryo culture, methanol, developmental toxicity, mouse embryo culture, in vitro, 205
renal mercury disposition, non-protein sulfhydryls, mercury nephrotoxicity, renal mercury excretion, 57
renal mercury excretion, non-protein sulfhydryls, mercury nephrotoxicity, renal mercury disposition, 57
reproduction, dieldrin, feed, gilts, progesterone, 165

skin, azinphos-methyl, paraoxon, malathion, gloves, knit, 195
skin cancer, chronic irritation, middle distillates, 103
stress, polyhalogenated aromatic hydrocarbons, aroclor 1254, corticosterone, adrenal, rat, Fishcer 344, 217
sustentacular cells, dichlobenil, metyrapone, Bowman's glands, olfactory mucosa, cytochrome P-450, 113

temperature, rat, toxicology, heart rate, thermoregulation, hypothermia, 15
tert-butylhydroperoxide, glutathione peroxidase, peroxidative stress, antioxidant enzymes, critical level, 89
2,3,7,8-tetrachlorodibenzo-*p*-dioxin, incisor tooth development, odontoblasts, ameloblasts, 1
2,3,7,8-tetrachlorodibenzo-*p*-dioxin, human B-cells, immunocompetence, 131
thapsigargin, cadmium, transforming growth factor, *myc*, *fos*, *jun*, mRNA accumulation, protein kinase C, protein kinase inhibitor, 155
thermoregulation, rat, toxicology, temperature, heart rate, hypothermia, 15
toxic oil syndrome, fatty acid anilides, prostacyclin, fibrinolysis, endothelial cells, arachidonic acid, phospholipases, 181
toxicology, rat, temperature, heart rate, thermoregulation, hypothermia, 15
transforming growth factor, cadmium, *myc*, *fos*, *jun*, mRNA accumulation, thapsigargin, protein kinase C, protein kinase inhibitor, 155

urine, metabisulphite, kidney, 'marker' enzymes, cellular integrity, 173

vascular smooth muscle, calcium, cadmium, nickel, detergent-permeabilized, 223
